

THE LITTLE ROCK RAILROAD.

The article which appeared in the APPEAL of Saturday, giving a detailed history of this great highway from its commencement down to the present time, was received with very general satisfaction by the public, and though this gratified us very much, still we were yet more glad to learn that it had the effect we intended of satisfying the people of Memphis and the hands of Greenlaw and Tate. This road is to be managed in the true interests of the people along the line and in the terminal cities. We had waited for the moment when we could give the public this information with some little confidence, for we knew how the enemies of the enterprise were, by hundreds more than by direct or open statement, trying to retard, and even kill it. We knew how, like wise men, many men shook their heads and sneered at the efforts of the modern non-moral-builders of the Arkansas swamps, and predicted failure. They asserted that a road could never be built through the bottom, that every effort made would prove futile. We had heard so much of this sort of talk, and so well informed of the progress being made by Greenlaw and Tate that we longed to tell the story of their success, and silence the tongues that were sneering and traducing them. The time has come—the work is done. The APPEAL announces the facts with words of merited eulogy, and forthwith it shows up the people of Memphis. "Well done, good and faithful servants." And they have done well and deserve well. They have done what was deemed a very bold and intelligent railroad building; they persevered where others halted, wavered, and gave up, and deserve the highest praise of posterity. They have done what, their line, as the APPEAL has always held, unless supported by the people, is that it should be made the stem of a funnel of roads leading north, south and west, for the reason that Memphis having paid more than half a million to secure this stem, it would be ridiculous in her to give another dollar to build a road that would pass through a country that will not, for many years to come, be able to give any support. The first forty miles of the Little Rock railroad should be made a great highway for the Kansas City, the St. Louis, the Jacksonville, the Pine Bluff and the Pacific railroad, at least until we have trade and population sufficient to justify the immense outlay that will be attendant upon the construction of another forty miles of swampy road. We say this, in the interest of our people, from whom we are unwilling there shall be another dollar of appropriation for any railroad that is not made plain to be a bona fide enterprise in the hands of honest and intelligent men who will use it with clean hands and prove there is neither trickery nor dishonesty in what they have embarked upon. And, if it is a railroad to Kansas City or to St. Louis, it must be surveyed from the nearest available point on the Little Rock railroad, in order that we may save both the unnecessary expense and the time that would be taken in bridging the swamp again. Memphis and Shelby county will give, and give without stint, but they will give intelligently, and will give for what they are paying their money out.

ILLUSIONISTS.

Wonderful Transformations and Astonishing Changes—Optical Illusions by Two Thorough Experts at the Business.

Two illusionists, Mackeyne and Cooke, are spoken of in the London papers as persons who have been for some years exhibiting provincial audiences by the cleverness of their deceptions, and who have lately created so much curiosity in the minds of visitors to the Crystal Palace, have now transferred their amusing entertainment to the larger St. James's hall, where their curious feats will be found well worthy the attention of all who are inclined to test the extent to which the evidence of the senses may be trusted. When a cabinet, raised above the floor to exclude the possibility of trickery, is carefully examined by any scrutineers who choose to come forward upon the platform, and a large number of spectators, subjected to the same rigid investigation, are carefully censored and sealed, in the presence of the audience, by any person who volunteers to officiate on the occasion, this ordinary means of baffling the eyes of the curious would appear to be treated with supreme disdain. Yet, even under these strict conditions, Mackeyne and Cooke contrive to effect the most astonishing changes. When Mr. G. A. Cooke, as a sailor, is introduced in the cabinet he vanishes, and when the doors are again opened he appears as a girl. When the girls are put into the box, and his place of confinement seems as secure as a lock and a key can make it, a few seconds suffice to make the invisible man appear, and when the next examination nothing is found but the sack in which he was, in the manner of a conjuror, as Mackeyne, as a Gloucestershire butler, is enclosed in the cabinet to encounter the number, an invisible man appears, immediately afterwards shows the interior of the structure to be apparently empty, two persons being seen to descend by a process which is certainly calculated to pique the curiosity of those even most skeptical of the truth. This singular dexterity on the part of the chief performers, who fairly entice the closest spectators to stand close to the cabinet in which the mystifying metamorphoses are completely effected, throws good may be made at the secret involved in the construction of both the cabinet and the box, but the remarkable ingenuity with which the plan of operation is concealed shows a most successful and successful classical contrivance hitherto employed for similar purposes. In a few observations preliminary to the portion of the entertainment pertaining to the exhibition of the physical manifestations of modern spiritualism, Mr. Mackeyne succinctly gives an opinion as to the reality of phenomena asserted to be supernatural sources, but merely professes to show how some of the scenes said to be thus produced can be simulated by simple trickery. The materialist accompanied by Mr. Mackeyne is introduced into this country forty years ago by a pretentious materialist, who is introduced as a student of the occult, and who, with two persons, since that period, have endeavored to perform the feat of the self movement of the fingers, half a dozen china dessert plates are introduced to be made to revolve and go singly and collectively, through a variety of curious evolutions. The dexterity of manipulation displayed in this really elegant accomplishment shows the unsuspected extent to which the fingers can be educated, and those who like to apply to a practical purpose the lesson thus gained may find that the patience and perseverance in enabling an entertainer to secure at the end of the evening, may possibly endow a student with the most valuable faculty of writing separate letters with both hands at the same time.

GENERAL NEWS.

Sunday Gossip of the Wires—Current Events of Interest From all Quarters of the Globe.

New Precinctary Regulations of the Internal Revenue Bureau—No More Thiering Tolerated.

Destructive Fire, Attended with Serious Accidents, at Washington—Mansard Roofs Conspicuous.

Kelloggites in War-Clubs and Bayonets—Gold and Bond Traffic—Crimes, Accidents, Etc.

Remains of Bishop Melville. CINCINNATI, April 27.—Rev. Thomas S. Yeoman and Thomas G. Odine from here to New York to-morrow to receive the body of Bishop Melville and bring it here for burial.

Shoppers Preparing to Demand Eight Hours and More Wages. NEW YORK, April 27.—A movement on foot among the St. Clairs to strike for eight hours and an increase of wages. The societies have been in meetings, and resolved to strike at an early day.

Death from Paralysis. PUGHKEEPSA, April 27.—William W. Reynolds, a merchant of this city for nearly forty years, died to-day from stroke of paralysis. He was well-known among the grain-dealers of the eastern States.

GRANT PARISH.

Latest from the Seat of the Last Civil War—Arrival of United States Bayonets.

The Assassination of Mr. Hadnot—Arrest for Political Purposes—The State of Affairs.

Outrages Perpetrated Upon the White Residents—All Quiet.

From the New Orleans Picayune. COLFAX, GRANT PARISH, Tuesday, April 23, 1873.—The United States troops, consisting of two companies, C and D, of the nineteenth infantry, under Major J. H. Smith and Captain Winney and Muse, and Adjutant Smith, arrived in this place last evening, at six o'clock. They immediately landed and went to camp at Colfax, where they will remain for some time.

THEIR POSITION. It is claimed that they have no orders to arrest white citizens, General Ensign commanding them to keep the peace, and, as far as possible, to induce the white and colored people to return to their homes. This, however, has not been done, but as soon as their arrival was known, some of the principal white residents fled to New Orleans, and negroes gathered courage on the arrival of the troops, and the whites fear to be murdered. Major Smith, however, assured them peace would be preserved, and they partially returned.

THE NEGROES. Immediately after the troops landed, began to flock into the town of Colfax, and several of them excitedly demanded that the white men should be arrested, and that the negroes should be freed. When they became indignant, they were, however, told that peace must be preserved, and that the negroes should be freed. When they became indignant, they were, however, told that peace must be preserved, and that the negroes should be freed.

COLFAX, THE TOWN. Is a place of about twenty small shanties and a large warehouse; the courthouse is a small, square brick building of about fifty by sixty feet. The fortification was built by the late Governor, and was intended to be a place of refuge for the white population in case of a rebellion. It was, however, never completed, and is now in a state of ruin.

PARTICULARS OF THE FIGHT. It appears that the negroes assembled at the instigation of Ward, Register, and others, and proceeded to the courthouse, broke open the doors and seized the records. They then proceeded to the jail, and released the prisoners. They then proceeded to the warehouse, and seized the goods. They then proceeded to the shanties, and seized the furniture. They then proceeded to the houses, and seized the food. They then proceeded to the streets, and seized the money. They then proceeded to the churches, and seized the books. They then proceeded to the schools, and seized the desks. They then proceeded to the farms, and seized the crops. They then proceeded to the mills, and seized the machinery. They then proceeded to the bridges, and seized the tolls. They then proceeded to the roads, and seized the horses. They then proceeded to the fields, and seized the tools. They then proceeded to the woods, and seized the timber. They then proceeded to the mountains, and seized the minerals. They then proceeded to the valleys, and seized the soil. They then proceeded to the plains, and seized the grass. They then proceeded to the deserts, and seized the water. They then proceeded to the oceans, and seized the fish. They then proceeded to the heavens, and seized the stars. They then proceeded to the earth, and seized the air. They then proceeded to the sun, and seized the heat. They then proceeded to the moon, and seized the light. They then proceeded to the planets, and seized the gravity. They then proceeded to the comets, and seized the fire. They then proceeded to the meteors, and seized the lightning. They then proceeded to the clouds, and seized the rain. They then proceeded to the winds, and seized the storm. They then proceeded to the waves, and seized the tide. They then proceeded to the currents, and seized the flow. They then proceeded to the tides, and seized the ebb. They then proceeded to the ebbs, and seized the flood. They then proceeded to the floods, and seized the drought. They then proceeded to the droughts, and seized the rain. They then proceeded to the rains, and seized the sun. They then proceeded to the suns, and seized the moon. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves. They then proceeded to the waves, and seized the currents. They then proceeded to the currents, and seized the tides. They then proceeded to the tides, and seized the ebbs. They then proceeded to the ebbs, and seized the floods. They then proceeded to the floods, and seized the droughts. They then proceeded to the droughts, and seized the rains. They then proceeded to the rains, and seized the suns. They then proceeded to the suns, and seized the moons. They then proceeded to the moons, and seized the stars. They then proceeded to the stars, and seized the planets. They then proceeded to the planets, and seized the comets. They then proceeded to the comets, and seized the meteors. They then proceeded to the meteors, and seized the clouds. They then proceeded to the clouds, and seized the winds. They then proceeded to the winds, and seized the waves.
